

A.C.E. JC2 H2 CHEMISTRY INTENSIVE REVISION SERIES @ MY CHEM CAFE® (2021)

JC2 H2 CHEMISTRY INTENSIVE REVISION SERIES @ MY CHEM CAFE® (2021)

At MY CHEM CAFE, we do not just offer crash course such as June holiday intensive programme, as we believe that most students need time to assimilate knowledge they learn. Hence, we offer a 2.5 month intensive revision programme (July to Sept) followed by 'A' Level revision (Sept to Oct) to help students prepare well for the coming school's assessment and 'A' Level examinations. The first session would commence from **5th July (Mon) 2021**. There will be no regular lesson during this period.

Key objectives of the programme:

1. To reinforce students' understanding on all JC1 and 2 topics
2. To make links across topics and enable students to apply knowledge in answering questions
3. To identify and fill any gaps in students' learning

Overview of the programme

There are 2 parts to this programme:

Part 1 – "Step Up" Intensive Revision Series (from **July to Sept**)

Part 2 – "The Final Lap" Revision for the 'A' Levels (from **Sept to Oct**)

Part 1 – "Step Up" Intensive Revision Series (from July to Sept)

For July, we would be starting on Physical Chemistry such as Chemical Energetics, Reaction Kinetics, Acid-base Equilibria, etc as we understand that it is one of the main concerns for students. Thereafter, we would be revisiting Inorganic Chemistry that includes topics such as The Periodic Table and Transition Elements (including Electrochemistry) and ending with Organic Chemistry. In addition, important concepts and techniques for Practical would also be covered. As we understand that the focus of examination is on the integration of topics learnt, Mr Jacky Wong has specially compiled sets of questions of varying levels of difficulty from past years' JCs Prelims to be given for practice and discussion.

Part 2 – "The Final Lap" Revision for 'A' Level (from Sept to Oct)

The focus of this final lap of revision would be on handling 'A' Level examination questions. A set of specially curated 'A' level past year questions by Mr Jacky Wong would be given to students for practice and discussion in class. Other than reinforcing key concepts learnt, examination answering techniques would also be taught in class. One of the key factors in getting a good grade in Chemistry lies not just in how well students know the subject but what the examiners require in an answer, knowing this can help students in sound time management for the papers.

Time:

Part 1 – July to Sept 2021 (Total: 15 sessions)

Every Thursday, 7.15pm – 9.15pm at Bishan **OR**
Every Saturday, 10.45am – 12.45pm at Bukit Timah
AND 5 other online sessions (on selected days and time)

Part 2 – Sept to Oct 2021 (Total: 6 sessions)

Every Thursday, 7.15pm – 9.15pm at Bishan **OR**
Every Saturday, 10.45am – 12.45pm at Bukit Timah
AND 1 other online session (on selected day and time)

Fees:

Part 1: July - \$540 for 6 sessions; *Aug & Sept - \$810 for 9 sessions

***Part 2:** \$540 for 6 sessions (**1st lesson commences on 30 Sept**)

***Fees are to be paid in full**

Class size is limited to a max of only 10 students to facilitate effective teaching and learning.

Please feel free to contact Mr Jacky Wong at 97910388 for more details on the revision schedule.

Lets' work together to support them in their last lap of preparation for the impending 'A' Level Exams!
